

Modplan adds the VEKA DUO composite door to its portfolio

Composite doors are UK homeowners' favourite choice of door, which is why trade fabricator Modplan has just added the VEKA DUO composite door to its product range. Chris Reeks, Modplan's Sales Manager, says, "We are always looking for ways to support our customers and enhance their portfolio and the VEKA DUO composite door is the perfect addition. It has a wealth of benefits that set it apart from its competitors and will help our customers to secure a bigger slice of the buoyant composite door market."

The VEKA DUO is made in the UK and its quality is more than clear to see. It is a 68mm composite door, so is 54% thicker than a standard composite slab for extra strength. It has a dual rebate sash and a steel reinforced sash profile as standard for enhanced security and improved rigidity and a Secured By Design version is also available. Double compression seals provide better insulation, which can be further enhanced with the triple glazing option.

Homeowners will love the choice of 12 door designs, seven door colours, 13 glass designs and choice of hardware because they will be able to personalise their door. Chris says, "The doors will complement VEKA installations perfectly, and with the large variety of options the homeowner will be spoilt for choice to create the perfect first impression of their home."

Alongside the homeowner benefits, the VEKA DUO composite has a wealth of benefits for you and your business. Firstly, it's packed with features for trouble-free installation. What's more, marketing support is available to help you make the most of the opportunities that are out there. And by working in partnership with VEKA Bowater, you can even receive homeowner enquiries straight to your inbox!

Chris concludes, "If you want to open the door to more sales then contact us today for more information or to request a quotation – you may never look at a composite door the same way again!"

Modplan manufactures and provides a comprehensive range of products that includes three VEKA profiles, composite doors, PVC-u and aluminium patio and bi-fold doors, conservatories, the Vertex solid tile-effect roof and glass and polycarbonate conservatory roofs. For more information on any of Modplan's products, including the VEKA DUO composite door, simply Ask the Man from Modplan.
