

Press release: Modplan Imagine bifold  
11<sup>th</sup> March, 2015

## **Modplan's Imagine bifold offers the aesthetics of aluminium and all the benefits of PVC-u**

The Imagine bifold door from VEKA was launched last year and has proved itself a big hit with installers and homeowners everywhere. Chris Reeks, Sales Manager at leading VEKA fabricator Modplan is clear why, "It combines all the aesthetics of an aluminium door with the thermal efficiency and easy-to-sell homeowner benefits you'd expect from a PVC-u product. It's the perfect combination and more and more customers are adding it to their portfolios."

The Imagine bifold door was designed from scratch with custom profiles and hardware to ensure the homeowner benefits from the latest in product design, development and technology.

The stunning and elegant design is enhanced with flush fitting sashes that maintain the door's clean lines. All components are contained within the profile, meaning no unsightly tracks need to be screwed onto the outerframe. There is a choice of 16 door style configurations, sculptured or bevelled sashes and standard, slim or room divider thresholds for the ultimate in versatility. The door is Secured By Design approved and meets PAS24 requirements plus comes with an ERA Hardware 5 Star Homeowner guarantee, which is one of the most comprehensive available. It is available in an A rated version and is triple glazed ready. And because it comes in a wide range of woodgrain and coloured foil options from the Variations range, the door will complement and enhance any home.

Also available in the Imagine suite is a French door. It combines the aesthetics of the flush finish profile with the versatility of a French door to provide an alternative for homeowners.

With all the credentials that the Imagine bifold door offers plus the reassurance of Modplan's partnership approach to its customers, it's hardly surprising it's proving such a hit with customers old and new.

Modplan manufactures and provides a comprehensive range of products that includes three VEKA profiles, composite doors, PVC-u and aluminium patio and bifold doors, conservatories, the new Open Canopy, the Vertex solid tile-effect roof and glass and polycarbonate conservatory roofs.
