

Press release: Modplan LEKA warm roof

18th April, 2016

Another industry first for Modplan

Leading VEKA trade fabricator, Modplan has become the first fabricator in the UK to offer the new LEKA Warm Roof. The new LEKA Warm Roof, which was launched at this year's FIT Show, offers a lightweight construction and achieves a U Value of just 0.15.

Speaking of the new product introduction Heidi Sachs, Managing Director of Modplan said, "We are delighted to be the first fabricator in the UK to offer the LEKA Warm Roof. And if the reception it has received so far is anything to go by, it looks set to take the solid conservatory roof market by storm."

At its heart, the LEKA Warm Roof has been designed and engineered using innovative technology to provide a conservatory roof that offers superb sound insulation, energy efficiency and rapid installation. But the reason the LEKA Warm Roof is attracting so much attention is that it offers something genuinely different. It's engineered and installed in layers, which is why it offers such an incredible U value.

The structural rafters, which comply with BS EN 13706, are constructed using GRP. This means they don't suffer from cold bridging, condensation or conductivity as you find with aluminium products, or moisture absorption issues associated with timber alternatives. LEKA insulated board replaces the usual plasterboard for the internal finish. It's the third of the weight of plasterboard and is insulated at the same time.

The roof is available in any design and can incorporate all sizes of Velux rooflights too providing additional light options. It offers a bigger span and a lower pitch too, giving it incredible design possibilities.

As you'd expect from Modplan, just having a ground-breaking product in their portfolio isn't enough. Customers can expect a full marketing support package, including lead generation along with full installer and sales training packages. The product has already been approved by Network VEKA and has achieved jhai Building Control accreditation too.

So if you're looking for a product to inject some excitement into your conservatory sales, then the new LEKA Warm Roof is for you.

Modplan manufactures and provides a comprehensive range of products that includes Matrix 58, Veka Matrix 70 and 70FS, Veka Vertical sliders, a dedicated painting facility, PVC-u patio and bifold doors, conservatories, the Vertex Open Canopy, the Vertex roof system for polycarbonate, glass or tile effect, Wendland roofing system and the newly added Ultrasky, Livin room and LEKA Warm Roof. For more information on any of the Modplan's products and support, simply Ask the Man from Modplan.
