

Press release: Modplan conservatory roofs
17th February, 2017

Comprehensive roof portfolio from Modplan

Leading VEKA trade fabricator Modplan have long held a reputation for manufacturing one of the most comprehensive product ranges on the market today and their conservatory roof portfolio is no exception. With several roofing options available, Managing Director, Heidi Sachs is clear as to why choice is important. She

comments: "We understand the importance of introducing homeowners to the difference that the right roof can make. Because while glass and polycarbonate are still the most popular options, there are a wealth of different solutions out there. Having a selection of these solutions in your portfolio will open up even more opportunities than ever before and mean you have the right solution no matter what the situation."

The LEKA Warm Roof from Modplan is the latest addition to Modplan's roof solutions and is ideal for new build and retro-fit projects. The LEKA Warm Roof is up to 40% lighter than other solid roofs on the market today and has a U value of just 0.15 W/m²K making it one of the best insulators of its kind too. It's the only GRP structured, fully thermally layered roof on the market and because it has no aluminium or wood, there is no cold bridging or condensation.

For installers looking for a choice of glass, polycarbonate or tile-effect roof options, the popular Vertex conservatory roof system is the perfect choice. The unique one piece GRP peripheral main beam incorporates an integral gutter, giving the roof a much greater inherent strength. It's been part of the Modplan portfolio for many years because it gives installers everything they need from a conservatory roof system. Available with ogee or dentil moulding, Vertex is a truly unique, upmarket roof solution.

For installers looking for the traditional conservatory roof, Wendland is a highly configurable roofing system that can be used on all Modplan's conservatories. It's a BBA-approved system and has an array of design options.

Modplan recently added LivinRoom and Loggia to their portfolio and it has been an incredibly popular addition. At its heart, it is a classic conservatory roof system, but the addition of an internal engineered steel frame that is plastered to give a perimeter ceiling creates the sophisticated feel that today's homeowner demands.

All Modplan's roofing solutions are manufactured in their dedicated roofing facility at its headquarters near Newport Gwent. So, if you want to grow your conservatory sales, think about how the roofs can make the difference to your portfolio and how Modplan can make it happen.

Modplan manufactures and provides a comprehensive range of products that includes Matrix 58, Veka Matrix 70 and 70FS, Veka Vertical sliders, a dedicated painting facility, PVC-u patio and bifold doors, conservatories, the Vertex Open Canopy, the Vertex roof system for polycarbonate, glass or tile effect, Wendland roofing system and the newly added Ultrasky, Livin room and LEKA Warm Roof. For more information on any of the Modplan's products and support, simply Ask the Man from Modplan.
