

Press Release: Modplan Warmcore  
21<sup>st</sup> May, 2015

## **Modplan adds the Warmcore Folding Sliding Door to its portfolio!**

Leading trade fabricator Modplan has just announced it has added the Warmcore Folding Sliding Door to its portfolio. Chris Reeks, Modplan's Sales Manager, said, "It is our policy to monitor trends to ensure our product range meets the needs of our trade customers. By adding the Warmcore Folding Sliding Door to our portfolio we can help our customers to meet the increased demand for an aluminium folding sliding door."

The decision to add the Warmcore Folding Sliding Door to its portfolio reflects Modplan's drive to be a valuable partner to

its customers, by providing a comprehensive product range that's in tune with market trends backed up with a level of service that recognises each customer's individual needs.

As you would expect from a product supplied by Modplan, the Warmcore system has market leading credentials. It has been designed from the ground up to offer best-in-class thermal performance, protecting against future tightening of Building Regulations Part L and providing a clear advantage over traditional aluminium doors.

It also offers superb aesthetics. Its slim sightlines, bi-fold, french and residential versions, choice of four profiles (pencil round, chamfered, square and decorative) and range of 16 colours, including four (white, cream, black, grey) that are available from stock, make it perfect for both residential and commercial settings.

Alongside the wealth of homeowner benefits, the Warmcore Folding Sliding Door system has been designed to be fitter-friendly too. The innovative clip-in bead design makes it easy to glaze without the need for wedge gaskets and the aluminium track design also enables a quick all-in-one fitting procedure without the need for de-sashing. Furthermore, plain hinges, pivot roller hinges and espag hinges provide +/- 1mm adjustment to cater for fine tolerances on site while single roller and double 'pivot' rollers provide +/- 3mm vertical adjustment for precision installation.

Chris concludes, "The Warmcore Folding Sliding Door system is a valuable addition to our range. With its stunning looks and practical benefits it offers everything our customers are looking for and more."

Modplan manufactures and provides a comprehensive range of products that includes three VEKA profiles, composite doors, PVC-u and aluminium patio and bi-fold doors, conservatories, the Vertex solid tile-effect roof and glass and polycarbonate conservatory roofs. For more information on any of Modplan's products, including the VEKA DUO composite door, simply Ask the Man from Modplan.
