

ENVIRONMENTAL POLICY

The scope of Modplan Environment Management System(EMS) includes all 4 sites located In Abercarn, near Newport, South Wales, for the supply and manufacture of glazed/unglazed windows, doors and conservatory roof systems fabricated to customer requirements, and a range of Garden Buildings.

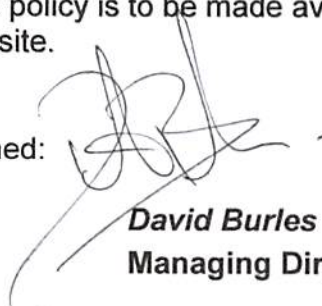

Modplan is committed to protect the environment. The businesses environmental impacts associated with our processes have been assessed; and are controlled through implementing our environmental management system and environment improvement objectives. Environment impacts are prioritised based upon the waste hierarchy, Waste Prevention, Re-use, Recycle/ compost, Energy recovery, these impacts include

- Prevent pollution at source through engineered controls and workforce training and environmental awareness.
- Emergency environmental controls in the event of an incident, e.g. spill kits
- Ensuring proactive awareness of and complying as a minimum with all environmental legislation, local planning licences and a commitment to maintain neighbourhood relations.
- Increase use of energy efficient processes to reduce tonnage of CO2, which includes investment in higher efficiency equipment, electrical equipment, lighting and controls; planning of vehicle movements with satellite tracking, and fuel efficient vehicles.
- Commitment to maintain the requirements of ISO14001:2015 Environment Management Systems.
- Increase the recycling % of plastic, cardboard, plastic, which currently is above 80%.
- Commitment for an annual reduction in waste sent to landfill.
- Determine and understand the needs and expectations of interested parties.

All at Modplan realise clear communication is vital to ensuring effective environmental management. Environmental improvement at Modplan is a continual process and we are committed to achieving this through yearly environmental objectives.

This policy is to be made available to all employees and to the wider public on the Modplan website.
