

# DOORS

THE WIDEST CHOICE, THE FINEST QUALITY AND THE HIGHEST STANDARDS

Your front door makes an important statement. It's the first thing people see, so you want it to be stylish and welcoming. But you also want it to be strong and secure because not all visitors are welcome ones.

A new door can be a big investment, so it's important you make the right decision. By choosing us, you have the reassurance that our products have been manufactured and installed by a company that's up-to-date with current legislation and backed by a guarantee. Our high quality products offer excellent thermal and acoustic insulation properties, high security and an original colour palette.

## OUR COMMITMENT TO THE ENVIRONMENT STARTS IN THE FACTORY

For us, awareness of our impact on the environment starts in the factory. We choose VEKA products because of their industry leading quality, but also because of the company's environmental commitment. It takes its responsibilities very seriously and leads the way in minimising the environmental impact of PVC-U at every stage of a product's life, including manufacture, fabrication, energy efficiency in the home and recycling. VEKA remains the world's only PVC-U system supplier ever to invest in a purpose-built recycling plant. The plant can recycle an old window into a brand new window, rather than simply recycling into lower grade products such as drain pipes as is the industry standard.

## HIGH SECURITY LOCKING AND OPTIONAL STEEL REINFORCEMENT

All our doors come with high security locking as standard. The frames are internally reinforced with galvanised steel, to provide additional strength and an extra safeguard against intruders.

You can also opt to add shootbolts to your doors if you want an additional layer of security. Shootbolts on our doors are from Yale, a well-known name to consumers up and down the country. Every Yale shootbolt is covered by the Yale Secure Scheme, which safeguards homeowners' insurance excess should they be a victim to a break-in through the window.

## ENERGY EFFICIENCY

In today's world, energy efficiency is essential. Energy efficient doors, windows and conservatories reduce heat loss, so your home feels warmer and less draughty. But more than that, you're reducing your carbon footprint, helping to protect the planet for future generations. Our window, door and conservatory products provide a perfect balance between energy efficiency and comfortable living.

Research suggests that home energy use accounts for around 27% of the UK's CO2 emissions. A simple change, such as fitting energy efficient windows throughout the UK could save an estimated five million tonnes of CO2!

# PVCU BIFOLD DOORS

PVCu bifold doors are a stylish addition to any product portfolio. They allow your customers to create a seamless transition between their interior and exterior areas. Their innovative side stacking opening system neatly folds back to allow full access to and from a building. PVCu bifold doors can be installed in both residential and commercial situations to maximise space and minimise viewing obstructions.

We manufacture Imagine PVCu bifold doors using high performance Veka systems. Veka is a world leader in the production of sustainable PVCu systems. Their high quality profiles have been used in installations across the globe. PVCu bifold doors are an increasingly popular choice in a wide variety of applications across the UK. Their innovative opening system is an excellent alternative to sliding patio or swing door options.

If you regularly carry out installations at high-end properties, PVCu bifold doors are an essential addition to your product range. We offer customers fully customisable PVCu bifold doors.

## IMAGINE PVCU BIFOLD DOOR SYSTEM FEATURES

- Multi-facet door panels
- Two-pane to seven-pane configurations
- Available in over 30 foil colour options
- Inward or outward opening
- Concertina style opening
- Profile colour matches with VEKA products

## BRING THE OUTSIDE IN

Imagine a garden party where you could relax in the comfort of your favourite armchair and still feel part of the fun. Imagine a gentle summer breeze carrying the scent of freshly cut grass into your home.

We pride ourselves on going beyond the simple definition of 'indoors' and 'outdoors', thinking our way past walls and windows to imagine a space that is the very best of both. Our Range of Imagine Bi-Fold Doors are designed to fully open up your room to the garden, creating an entirely new living space that is neither 'in' nor 'out', but that combines the best attributes of the two.

Blurring the lines between where a home ends and a garden begins, our Bi-Fold Doors create unique living spaces as versatile as they are beautiful. They are a stunning alternative to French or Patio Doors and can be installed so that the doors sit inside or outside the property when folded back – the choice is yours.

Of course, as well as being a beautiful way to bridge the gap between your home and garden, they can also be used to separate rooms within your home creating a truly unique and adaptable space.

# PVCU PATIO DOORS

In-line sliding patio doors are an essential part of any installers portfolio. For installations where space is limited, they are an excellent solution. Available in White, Rosewood, Rosewood on White, Golden Oak, Golden Oak on White and a range of coloured foil options that can be incorporated into any property's design. They are sleek and stylish and provide an easy opening function which is durable and user-friendly.

## VEKA PVCU PATIO DOOR SYSTEM

Welcome to the pinnacle of PVCu door technology – an uncompromising suite of folding, sliding doors that offers style, functionality, security and thermal performance in equal measure.

We dared to Imagine Doors done better. Why do French Doors need that obtrusive central pillar? Who says Bi-Folding Doors have to take up lots of space? Why can't a Patio Door have a letterplate? We asked ourselves these questions and more, literally going back to the drawing board to deliver a truly pioneering family of new and upgraded designs

## PVCU PATIO DOOR SYSTEM FEATURES

The VEKA PVCu patio door system is compatible with all VEKA window systems. The sashes can either be bevelled or fully sculptured to match the property's other glazing. VEKA patio doors can be installed in a range of sizes. They are available with two, three, or four panes, with any opening combination; including more than one opening sash. VEKA patio doors provide excellent levels of security protection. They can be glazed with 28mm toughened or laminated glazing and feature a multi-point hook lock. Anti-lift blocks are used to further enhance security and an optional anti-drill, anti-pick cylinder can be installed to optimise resistance to forced entry. Suitable as a rear home entrance, a conservatory door, or for a range of commercial applications, their versatility is an excellent selling point.

## ELEGANCE

The Imagine Doors' elegant and understated looks belie a wealth of technical innovations, hidden beneath the surface. The Imagine Bi-Fold Door and French Door were designed in partnership with leading hardware manufacturer, ERA, using bespoke components to achieve the recognised PAS 24 and Secured By Design security accreditations from the day of their launch.

This commitment to future-proofing our products makes Imagine the suite of doors for discerning homeowners who want enduring safety, warmth and style for their home.

## RESIDENTIAL AND FRENCH DOORS

We manufacture French doors and single residential doors using high quality VEKA PVCu systems. We provide a made to measure service which allows you to offer your customers a bespoke entrance door solution. Single residential doors are one of the most regularly replaced glazing products in the UK. Every installer should be able to offer their customers a selection of secure and high performing entrance door solutions. When you need to accommodate a larger opening, our double doors provide the same.

## RESIDENTIAL DOORS

The VEKA versatile PVCu system, perfect for manufacturing both single and double residential doors. It is easy to fabricate and allows design versatility while meeting increasingly stringent industry requirements. It is recognised across the fenestration industry for its easy installation capacity and has a large selection of compatible components, enabling multiple configurations. Multiple glazing options are available, from half glazed and fully glazed doors to solid PVCu panels and small sections of glazing. For trade customers, residential doors are a cost-effective and high performing entrance door solution. They are an essential addition to any installer's product portfolio.

## VERSATILITY

PVCu doors offer a modern alternative which perfectly match windows throughout a home. With a vast array of colours to select from, you can also choose a different colour inside and outside. Tried, tested and trusted throughout the UK. The versatile and popular door are perfect for domestic, new build and renovation projects. It is also renowned for delivering trouble-free installation, making it the perfect addition to your portfolio.

Composite doors are now the most specified door in the UK. They are popular for both residential replacements and new-build installations. Composite doors are completely customisable and provide some of the highest levels of performance available today.

They are great for traditional and contemporary properties alike. Their stylish and durable finish features a realistic wood grain effect which provides excellent weather protection.
